WEYMOUTH

Let Us Help You

Welch Senior Living and Allerton House at Central Park in Weymouth understand how challenging the coronavirus has been for all families, especially when a loved one needs ongoing support and assistance. After adapting new move-in guidelines, we are pleased to share that several new residents have joined us recently and are settling in comfortably.

BENEFITS OF LIFE AT ALLERTON HOUSE

Allerton House is a family-oriented community with private, rental apartment-homes. We provide a safe and more engaged environment than many people find elsewhere.

Resident Care Assistants are available around the clock to help with individual routines, such as activities of daily living and medication management.

Residents engage in small group arts activities and exercise, all with appropriate social distancing. Hotel-style room service is now a favorite among our residents, along with gardening, shuffleboard, and walks around the campus.

MAKING A SMOOTH TRANSITION: FURNISHED APARTMENTS AVAILABLE

We are pleased to offer the option of fully-furnished apartments upon move-in, simplifying the transition during this difficult time. This is an attractive option for families whose loved ones need care now, but would prefer to postpone moving in their own furniture.

Respite stays are also available, allowing family caregivers a short break and giving loved ones an opportunity to experience all that our community offers.

POLICIES ON NEW RESIDENT MOVE-INS

We have instituted a variety of procedures and protocols to facilitate new resident move-ins while continuing to protect our community's health and well-being.

- All residents must be vaccinated against COVID-19 and provide proof of vaccination prior to move-in.
- Every new resident is required to have a COVID-19 test 24-48 hours prior to moving into the community. Proof of a negative test result is required to move in.
- Allerton House will follow guidelines from the CDC, DPH, EOEIA and the Board of Health for mask usage and quarantine procedures for residents that test positive or have been in close contact with an individual that has tested positive.
- A TB test is required within 30 days of move-in.

VISITATION

Outdoor visits are now permitted, according to the Massachusetts Executive Office of Elder Affairs (EOEA). Strict infection control protocols are in place to maintain everyone's health and safety and to ensure healthy in-person reunions.

VIRTUAL SCREENINGS/VIRTUAL TOURS

Obtaining virtual assessments is quick and easy, due to our longstanding relationships with hospitals, skilled nursing and rehabilitation centers, geriatric care managers, physicians, and visiting nurse associations.

With today's technology, we don't skip a beat when touring individuals and families. Virtual Tours using Face Time, Skype, or Zoom let everyone discover our beautiful private apartments, gracious common spaces, and lush outdoors.

COMPREHENSIVE HEALTH & SAFETY PROTOCOLS IN PLACE

All Allerton House staff have received training on Comprehensive Infection Control Policies. Staff wear face masks, other appropriate PPE, and engage in proper handwashing hygiene and social distancing.

Staff are screened daily according to state and federal protocols.

Staff have been properly trained in disinfection procedures for resident apartments, common areas, including common restrooms, staff lounges, offices, and commonly touched surfaces.

Alcohol-based sanitizers are readily available throughout the community.
